

COP22 Japan Pavilion Side Event

Meeting needs and gap: How can we increase the effectiveness and the efficiency of capacity-building in developing countries?

- Lessons learned from cooperation on INDCs, NAPs and transparency -

This event focuses on how we can increase the effectiveness and the efficiency of capacity-building in developing countries. Driven by the Paris Agreement, there are increasing needs for capacity-building cooperation especially in preparing for INDCs, NAPs, as well as arrangements for transparency. Recent cases show that developing countries and multilateral and bilateral development partners developed good practices, including new business models and methods. Taking up such cases, the event will be organized in a panel discussion style.

Date: 11:00-12:15, 9 November (TBC)

Venue: Japan Pavilion

Draft Agenda

11:00-11:05	Opening Remarks	<ul style="list-style-type: none"> ● Junichi Fujino (Institute for Global Environmental Strategies)
