

CARIBBEAN COOPERATIVE MRV HUB

Measurement • Reporting • Verification

MRV Hub Steering Committee in Bonn, Germany: The MRV Hub Provisional Steering Committee for the Caribbean Cooperative MRV Hub held its meeting on June 21, 2019 in Bonn Germany during the UNFCCC SB meetings. *The conference building is shown near bottom right with its distinctive roof skylight.*

The Provisional Steering Committee (SC) adopted terms of reference (TOR) or formal guidelines for how the SC will operate, including who serves on the SC and when meetings will take place. Finalizing the TOR is an important step in The MRV Hub's maturation into a permanent regional institution; at The MRV Hub's next Annual Meeting the Steering Committee will cease its 'provisional status' and become fully operational.

The meeting was attended by all 8 members of the SC as well as 6 other attendees. The SC took a number of actions including directing The MRV Hub Secretariat to do the following:

- Develop Standard Operating Procedure (SOP) materials for use by The MRV Hub that will incorporate provisions to address conflicts of interest (COI)
- Begin building a regional roster of experts.
- Follow up on modeling work done by CCREEE, with the assistance of Carlos Fuller (5Cs)
